Demographic Data-

- Zip Codes

- Household Income

- Own/Rent

- Education Level

Subscriber Data-

- FOD

- Length of Subscription History

- Payment History (monthly, Quarterly, Easy-Pay, etc.)

- Renewal attrition rates by FOD over time

- New Subscriber Acquisition by FOD, Term & Price

Types of Analysis

Revert Performance - How many of increased subs revert to former price or FOD lower than billed

Control groups for testing - i.e. more aggressive pricing model for certain geographies, FODs or payment histories

In depth weekly revenue and volume forecasting for:

Core subscribers – Projected attrition rates

New Starts at 1st renewal – different attrition rates
based on recent results

Projected Weekly Stop volumes (including 'price' stops)

Budget Built on Data

- Subscriber Profile Factors:
 - Establish Property Business Rules
 - How often rates get increased, Target increase %, Stop volume Tolerance, Exclusions
 - Core Subscriber attrition rates by FOD & price/term
 - Price Elasticity from Mather analysis by FOD
 - New Starts sales volumes by FOD/term/price overlaid with historical fall-off %s
 - Projected Stops based on attrition rates by FOD
 - Additional stop projections due to price

Budgeting

The Denver Post - 52 Week Circulation Projection											52 Week - Revenue			52 Week - Stops		
											\$\$\$\$,\$\$\$			XX,XXX		
W/e Date	Base Accounts	Base Attrition	Base Revenue	Total Increased Accounts	Price Based Attrition	Net Incremental Mather Revenue	Total New Starts	New Start Attrition	New Start Price	New Start Revenue	Total Revenue	Total Accounts	Average Rate	Total Stops	Weekly Stops	Weekly Starts

Results

- Process provides us with:
 - Weekly summary of transactions
 - Weekly revenue (from actives, stops, vacations, restarts)
 - We compare this with budget and internal reporting
